

WHO WE ARE

Hima Laboratory for Environmental Testing is a nationally recognized, and independent environmental testing laboratory, which specializes in testing, monitoring and reporting of various key environmental parameters.

We are committed by passion, and by our ISO17025 certification to providing high quality services at a competitive price with first-class customer service.

Our adaptable, scalable technology is built to accommodate the ever-changing marketplace.

We look forward to being of service to you!

Hima Laboratory for Environmental Testing

LABORATORY EQUIPMENT

Hima laboratory for Environmental Testing boasts of:

- A wide range of high performance, leading edge & latest monitoring equipment
- State-of-the art equipment
- Convenient, portable and flexible equipment
- Does not generate any noise, and therefore, will not cause any disturbance.
- Continuous and real time monitoring equipment with data-logging outputs.
- Meets USEPA and OSHA specifications.
- Calibrations are always completed in accordance with ISO 17025:2005 and manufacturer specifications.
- All calibrations are traceable to NIST where applicable.
- Each piece of equipment is operated and handled by an engineer specialized in predefined areas to offer the best services to the customers.
- We are pioneers in using passive diffusion tubes for ambient air monitoring.

OUR VALUES

- Confidence and Integrity.
- Reliability, Quality and Accountability.
- Excellence and Knowledge Updating
- Customer Satisfaction

We work closely to ensure you understand our findings and to discuss any potential implications for your organization.

Our software and trained staff allow us to present data tailored to your needs. It is this comprehensive technical capability coupled with our experienced team and understanding of national regulations that elevates our laboratory to partner of choice for environmental testing.

OUR MISSION

As an independent testing laboratory; Hima Laboratory for Environmental Testing core mission is to provide accurate, sound and defensible data wherever needed to support environmental decision making.

We are dedicated to environmental improvements in our country by fostering working together with area businesses.

Our relentless dedication to customers, our team & ourselves creates a superior customer experience.

OUR VISION

our vision is to be the most trusted provider of environmental testing services in Jordan through continuous improvement, development and actionable strategies.

We will:

Conduct ourselves with integrity and respect our Company Values.

Foster an environment of innovation, collaboration, and trust in our company.

OUR SERVICES

Hima Laboratory for Environmental Testing offers testing and monitoring services operating with the latest and most advanced analyzers and test equipment.

We focus on:

- Ambient air quality
- Stack emissions
- Work areas air quality
- Noise monitoring

We measure:

- Stack emissions: these emissions include SO₂, H₂S, NH₃, CH₄, CL₂, NO, NO₂, CO, CO₂, VOCs, hydrocarbons heavy metals and dust emissions (TSP, PM₁₀ & PM_{2.5})
- Stack parameters (temperature, pressure, velocity, flow rate, heat losses, excess air, efficiency and flue gas dew point)
- Ambient air measurements: these include SO₂, H₂S, NH₃, CH₄, CL₂, NO, NO₂, CO, CO₂, VOCs, hydrocarbons heavy metals and dust emissions (TSP, PM₁₀ & PM_{2.5})
- Passive monitoring technology for NO₂, SO₂ and NH₃
- Indoor & work area measurements: these include SO₂, H₂S, NH₃, CH₄, CL₂, NO, NO₂, CO, CO₂, VOCs, hydrocarbons heavy metals and dust emissions (TSP, PM₁₀, PM₇, PM_{2.5} & PM₁), temperature, humidity, noise & illumination

We supply accurate reports and expert opinion on:

- State of the environment and the extent of pollution
- Impact assessment
- Process evaluation and improvement
- Work areas assessment
